

# YOUR FULL- SERVICE CRO™

“We created a world-class CRO by investing in people, technology and environmental sustainability”

**Bradley D. Vince, D.O.**  
CEO & Chief Medical Officer

+1 913-333-3000

# Study Types

Dr. Vince Clinical Research (DVCR) is a full-service CRO specializing in early phase clinical trials across various designs, therapeutic areas and drug classes. Most of these studies are performed at our world-class Phase I research facility, with others performed through strategic partnerships with qualified external sites where DVCR serves as the CRO.

## Early Phase Studies

- First-In-Human
- SAD/MAD
- DDI
- TQT/Early QT
- PK/PD
- Food Effect
- Proof of Concept (POC)
- BA/BE
- ADME
- Hepatic Impairment
- Renal Impairment
- Patient Studies

## Specialized Studies

- Human Abuse Potential
- Experimental Pain Models
- Human Pain Models
- Cognitive Testing
- Substance Abuse/Dependence
- Ventilatory Response
- Driving Simulation

# Support Services

## for Phase I-III Clinical Trials

### Full-Service CRO Solutions

**90-Bed  
Phase I Unit**

**Project  
Management**

**Data  
Management**

**Biostatistics  
& Programming**

**Clinical  
Monitoring**

**Medical  
Writing**

**PK/PD  
Analysis**

**Medical  
Monitoring**

**Multi-Site  
Trials**

# Multi-Site Trials

The DVCR team has significant experience managing external site activities for the seamless delivery of high-quality data to our sponsors, including external site feasibility and management. We maintain a network of strategic sites that have a diverse range of capabilities and patient populations to conduct multi-site clinical studies (Phase I-III). Our robust site feasibility and selection process ensures that the most capable sites are participating in your study and that they align with DVCR's commitment to speed, customer service and delivering the cleanest data possible.

## Our Multi-Site Model

**Prioritizing Site Payments**

**Custom Built**

**Site ID and Selection**

**Site Engagement**

Our model prioritizes sites that leverage these principles to help our sponsors reach their milestones faster.

“

“As a result of DVCR’s experience and determination, this study was completed on time and within budget. I would highly recommend using DVCR for clinical studies without reservation. As a company, we will be using DVCR for future clinical pharmacology studies.”

Executive Director of Clinical Pharmacology  
August 2024

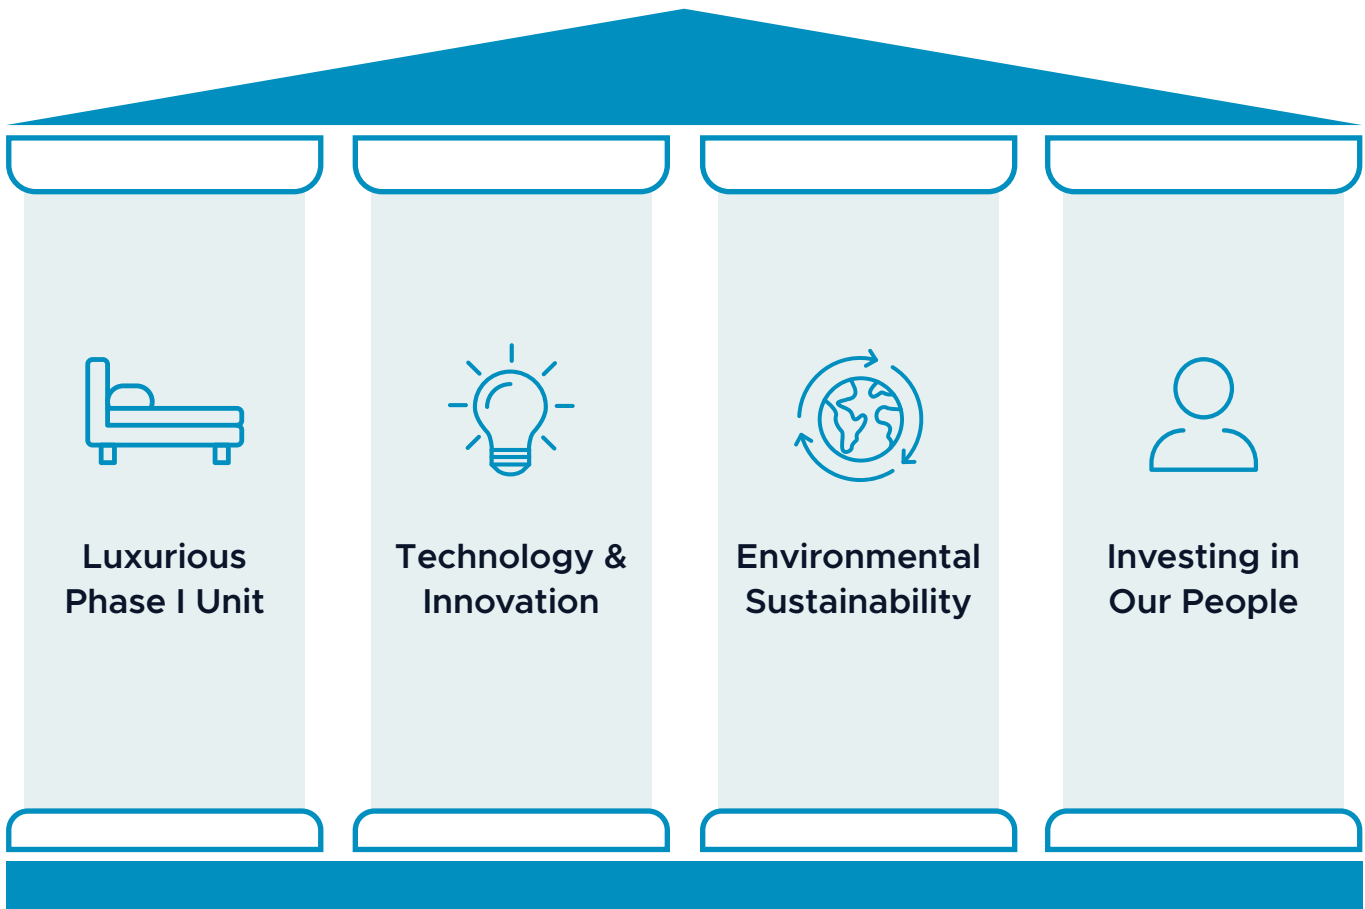

# What Differentiates Us?

Every single detail of the company and facility has been reimagined to provide the optimal environment for clinical study execution.

At DVCR we believe that all studies deserve the absolute best in planning and operational conduct.

This principle is built on the foundation of our four pillars:

# Luxurious Phase I Unit

## Designed Differently

We designed one of the world's most innovative and technologically advanced research centers to achieve ultimate speed, efficiency and enhanced data quality. To accomplish this, we built our facilities from the ground up, creating the optimal environment for study execution. Leveraging the newest technology and equipment alongside our highly experienced clinical team allows us to fulfill our recruitment and quality commitment to sponsors.

 75,000 square foot research complex

 90-bed clinical pharmacology unit

 8 private suites with full baths

 cGMP compliant pharmacy

 Indigo-Clean® light technology to fight COVID

 Holter monitoring capabilities

 Records storage with gaseous fire suppression

 Located near multiple hospitals and ERs

# cGMP Compliant Pharmacy

Our pharmacy team has over 50 years of experience in early clinical development, with expertise in the handling and manipulation of investigational products across various routes of administration.

Housed within our Phase I unit, the 2,500 square foot cGMP compliant compounding pharmacy contains five distinct areas for the preparation and storage of study drugs:

- Main pharmacy area with closed cell insulation for maintaining environmental controls for ambient storage of study drug(s)
- Locking custom floor-to-ceiling cabinetry for non-controlled substances
- USP-795 compliant negative pressure extemporaneous preparation room
- USP 797 compliant ISO 8 (Class 100,000) Anteroom
- USP 797 compliant ISO 7 (Class 10,000) Clean Room
- Spacious storage area with cold storage units

## Pharmacy Features and Equipment

- > Thermo Fisher cold storage units with 24/7/365 temperature monitoring
- > Secured storage of controlled substances
- > Class II, Type A2 biological safety cabinets
- > Semi-micro analytical balance for weighing powder API
- > Independent narrow spectrum 570nm amber LED lights for handling photosensitive API
- > Labconco XPert Filtered Balance System
- > HEPA filtration throughout entire pharmacy
- > Biometric facial screening

# Unsurpassed Volunteer Recruitment and Retention

At DVCR, a significant component of being designed differently is how much we value the volunteer experience. This enables us to achieve unmatched speed and diversity in recruitment. You can see this sentiment at work the second you walk through our doors. Additionally, the entire DVCR campus features an array of volunteer amenities, each one thoughtfully planned to enhance the volunteer experience in order to optimize recruitment and retention.

Sports-themed dining room with plush seating and nine large-screen TVs

Gaming room equipped with state-of-the-art systems

VIP lounge with floor-to-ceiling windows and spacious seating

Private rooms designed to receive phone or video calls

Committed to enhancing the volunteer experience

“

“Their upfront investment in creating accurate, transparent and defensible budgets has kept financial guidance consistent, which has been a refreshing experience compared to other CROs. I have been extremely happy with Dr. Vince Clinical Research.”

Chief Scientific Officer  
March 2024

DVCR has impressive, on-time recruitment, enrollment and retention rates.

# Envisioned Around Technology

## Experience True Tech Integration From Start to Finish

Utilizing cloud-based technology and the highest levels of encryption available, we provide secure data with optimal redundancy, reliability and accessibility.

### Our design features integrated platforms including:

- eSource/Clinic Workflow Automation System
- Electronic Data Capture (EDC)
- Building Management System
- Inventory Management System
- Clinic staff utilize real-time hands-free communication devices
- Wireless Temperature Monitoring
- Wifi-Telemetry with Redundant Server Storage
- Touchless Biometric Access Controls

By using these and other automated systems, we have transformed standard industry practices to become a leader in technology-based clinical research.

# Smarter Faster Data®

We define Smarter Faster Data® as accurate, actionable and audit-ready. This accelerates your time in the clinic and speeds up review, quickly producing clean and robust data through seamless tech integration.

Expedited IRB review via our collaboration with WCG IRB

Strategic partnership with Clario to deliver high-quality cardiac safety data

Dedicated vital signs machines at each bed to reduce data variability

Equipment integration with eSource/EDC for automatic data upload

Deployment of bar code scanning for improved data quality and subject verification

Real-time Sponsor access to live data

# Powered by People

“

“The project managers, clinical monitors, investigators, entire clinical pharmacology unit team, medical monitor and data managers have years of experience with the management and conduct of early phase studies. I highly recommend DVCR.”

Physician Scientist and Biotech Executive  
March 2024

## Unmatched Expert Insight and Support

At DVCR, we invest in people, cultivating unmatched expert insight and support. Each member of our diverse leadership team was hand-selected to provide expertise and practical insights into every facet of study execution.

**Robust training**

**Cutting-edge technology**

**Positive and uplifting work culture**

**A workplace designed around collaboration**

**At DVCR we have one of the most experienced leadership teams in the country.**

# Committed to the Environment

## Industry Leading Green Design

DVCR prioritizes its commitment to the environment, opting for industry-leading green design in our construction and cutting-edge conservation strategies. This intentional design has resulted in the award of two Green Globes Certifications, a comprehensive, science-based rating system with rigorous environmental standards.

Over 500 solar panels

Car charging stations

Water conservation strategies

Demand-controlled ventilation

# In-House Clinical Laboratory

The state-of-the-art clinical laboratory enhances the capabilities of our clinical pharmacology unit by enabling in-house safety testing, minimizing logistical challenges and enabling us to deliver faster results.

**Our clinical laboratory performs a comprehensive range of safety tests, including:**

**Chemistry and  
Immunoassay**

**Hematology  
CBC with 5-Part  
Differential**

**Coagulation**

**Urinalysis with  
Microscopy**

## Key Features of Our Clinical Lab

**Advanced  
instrumentation with  
high throughput and  
comprehensive  
test menus**

**Duplicate  
instrumentation for  
continuous operation,  
eliminating downtime**

**Full integration with  
DVCR's clinic eSource/  
EDC system for enhanced  
speed and accuracy**

Tests are performed on four advanced instruments validated per CAP and CLIA regulations. The instruments are interfaced with our EDC system, allowing for real-time results and review capabilities. All instruments have been purchased in duplicate to ensure continuous operation and minimize the potential for downtime.
